Common Problems When Using Non Professional Companies/People

- ✗ Misleading Hourly Rates
i.e. £30 per hour, but the job gets dragged out for 5 hours
- ✗ Computer Enthusiasts with No Real Technical Expertise
- ✗ Use of Pirated-Non-Genuine Software on Your PC
- ✗ Symptoms Taken Care of but Problem Not Resolved
- ✗ No Guarantee on Work
- Problems Left & Your Calls Never Answered

What our customers say...

"When my home PC crashed, I was nervous about calling an engineer out as I thought I may end up paying a fortune. APCS were efficient and priced fairly. The engineer was friendly and explained clearly what he was going to do. He fixed the problem and also was able to add software, security and a secure back up so I won't lose any data in the future."

Ruth, Bearwood

"Affordable PC Services came and picked up my laptop, installed a new hard-drive, and retrieved all my files as well as updating my computer with the latest software. My laptop has never worked better, and the repair has even fixed some issues I was having with my wireless connection. Cheers guys."

Tom Ray, Student, BCU Birmingham

"Thanks to your visit. I tried everything I could to fix the PC myself but was unable. I was offered help and advice and told exactly what the problem was and how it was fixed."

Nita, Birmingham
